BHAGYA NAVODYANI

Software Developer | Python & Machine Learning | Full-Stack Applications
Sri Lanka | +94 71 894 8109 | bhagyanavodyani000@gmail.com
GitHub | LinkedIn | Portfolio: bhagya-navodyani.github.io/My-Portfolio/

PROFESSIONAL PROFILE

Information Technology undergraduate with six months of software development internship experience, including intern team leadership. Built and tested Java/Spring Boot REST APIs, React interfaces and MySQL workflows; worked with authentication, QA and Git collaboration. Applied Python, IoT data collection, preprocessing and Random Forest evaluation in a fish-storage research prototype. Interested in software engineering, Python and AI-related technical roles.

EDUCATION

BSc (Hons) in Information Technology | Sri Lanka Institute of Information Technology (SLIIT) | Expected 2027

Diploma in Accounting and Business | AAT Sri Lanka

Secondary Education | PL / Royala Central College

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL, C, C++, PHP, Kotlin

Frameworks & Web: Spring Boot, React, Node.js, Express.js, REST APIs, HTML/CSS, Tailwind CSS, Flutter

Machine Learning & IoT: Data preprocessing, feature engineering, Random Forest, model evaluation, ESP32-S3, sensor integration

Databases & Tools: MySQL, MongoDB, Git, GitHub, Postman, Arduino IDE, AWS fundamentals

PROFESSIONAL EXPERIENCE

Software Development Intern & Intern Team Leader | SLT-MOBITEL | 6 months

- Built and tested Java/Spring Boot REST endpoints and MySQL-backed CRUD workflows for a task and workflow management system.
- Contributed to React interfaces, JWT-based access control, Azure AD single sign-on and email notifications.
- Tested APIs with Postman, supported web QA and collaborated through GitHub version control.
- Coordinated intern-team tasks, communicated progress and supported development and testing delivery.

SELECTED PROJECTS

SeaGuardian — Intelligent Fish Storage Monitoring & ML | Python, ESP32-S3, IoT, Flutter

- Developed an IoT fish-storage prototype collecting temperature, humidity, gas-sensor data and lid-open events.
- Logged timestamped readings, assessed sensor validity and prepared features for spoilage-state classification.
- Evaluated Random Forest model results with validation/test sets; supported a Flutter platform prototype.

Smart Campus Operations Hub | React, Spring Boot, MySQL

- Developed resource CRUD, advanced search, dynamic filters, equipment details and availability views.
- Supported role-based resource booking and maintenance workflows through REST-backed interfaces.

Smart Food Management & Redistribution | MERN Stack

- Built inventory and expiry tracking, dashboard views and donation/redistribution workflows to reduce food waste.

Additional Projects: Medicine & Drug Management; Coconut Product Management; Boat Safari Management.

CERTIFICATIONS & TRAINING

- AWS Academy Cloud Foundations — AWS Academy
- AWS SimuLearn — Security, Networking and Highly Available Web Applications
- Front-End Web Development — University of Moratuwa
- Object-Oriented Programming in Java — Simplilearn
