PROFESSIONAL SUMMARY

Software development intern and BSc (Hons) Information Technology undergraduate with hands-on experience building full-stack applications, REST APIs and machine-learning prototypes. Experienced with Python, Java, Spring Boot, React and SQL; comfortable working with code debugging, API testing, sensor datasets and model evaluation. Seeking software engineering, Python development and AI code evaluation opportunities.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL, C, C++, PHP, Kotlin

Frameworks & development: Spring Boot, React, Node.js, Express.js, REST APIs, HTML/CSS, Tailwind CSS, Flutter

Data & ML: pandas, data cleaning, feature engineering, Random Forest, classification metrics, IoT sensor data

Tools & platforms: MySQL, MongoDB, Git/GitHub, Postman, AWS fundamentals, ESP32-S3, Arduino IDE

PROFESSIONAL EXPERIENCE

Software Development Intern / Intern Team Leader | SLT-MOBITEL | 6-month internship

- Developed and tested backend CRUD functionality with Java Spring Boot, MySQL and REST API service layers.
- Contributed to React-based interfaces, JWT authentication, Azure AD single sign-on and email notification workflows.
- Used Postman and GitHub for API verification, bug investigation, code collaboration and web quality-assurance tasks; coordinated team activities as intern team leader.

SELECTED TECHNICAL PROJECTS

SeaGuardian - Intelligent Fish Storage Monitoring & Quality Prediction | Python, ML, ESP32-S3, Flutter

- Implemented IoT-based monitoring of storage temperature, ambient conditions, gas sensor readings and lid activity; logged time-stamped observations for analysis.
- Prepared sensor data and evaluated a Random Forest classification prototype for storage-quality prediction; reported validation and test results and investigated sensor-data validity.

Smart Campus Operations Hub | React, Spring Boot, MySQL

- Built resource inventory and discovery features with CRUD operations, multi-criteria filtering, availability views and role-based workflows for campus facilities and equipment.

Smart Food Management & Redistribution | MongoDB, Express.js, React, Node.js

- Developed a food inventory and expiry-management application with dashboard views and donation/redistribution workflows designed to reduce food waste.

Other software projects | Java, Web Technologies

GitHub repositories include medicine and drug management, coconut-product management, and boat safari management systems.

EDUCATION

BSc (Hons) in Information Technology | Sri Lanka Institute of Information Technology (SLIIT) | Expected 2027

CERTIFICATIONS & TRAINING

AWS Academy Cloud Foundations | AWS SimuLearn (security, networking, high availability) | Front-End Web Development - University of Moratuwa | Object-Oriented Programming in Java - Simplilearn
